**Objective of the Survey:**

With the opening of the world economies and technological developments taking place at rapid pace; software & IT services exports and BPO activities have gained enormous importance in India's economy. The country does not have an adequate system of recording data on software and IT services exports and BPO activities, essentially for the Government of India (GoI) and other agencies, viz. Reserve Bank of India (RBI), for taking further policy initiatives required for giving necessary thrust to these sectors. Besides, dissemination of certain information on these sectors at aggregate level [under Balance of Payments Statistics (BoPS) and under National Accounts Statistics (NAS), etc.] to the public raises the confidence of the international financial system in the country's economy. This survey is taken up for the fulfillment of the above objectives.
