Dear Sirs,

NBFCs- Lending against Shares

At present, lending against shares carried out by NBFCs is not subject to specific instructions apart from the general prudential regulation applicable to all NBFCs. Lending against shares could be in the normal course where shares are accepted as collateral or as part of their capital market operations. NBFCs lend either by way of pledge of shares in their favour, transfer of shares or by obtaining a power of attorney on the demat accounts of borrowers. Irrespective of the manner and purpose for which money is lent against shares, default by borrowers can and has in the past lead to offloading of shares in the market by the NBFCs thereby creating avoidable volatility in the market. Certain other associated areas of concern relate to absence of adequate prior information to the stock exchanges on the shares held as pledge by NBFCs, probable overheating of the market, over-exposure by NBFCs to certain stocks and overleveraging of borrowers. Further, while NBFCs in general are understood to have in place their own internal controls with regard to lending against shares including a loan to value (LTV) ratio, there are anecdotal evidences of volatility in the capital market being the result of offloading of shares by NBFCs. It is, therefore, found necessary to introduce a minimum set of guidelines on lending against shares while at the same time ensuring that these do not result in unnecessary constraints to the requirements of genuine borrowers.
